

# Plastic Dummies and Scent Bands

The reason for the color difference in the plastic dummies is the same as in the canvas. Since most black dummies are used in cold weather, they are made with a higher percentage of rubber to keep them flexible.

## Sure-Grip Dummies

**Soft plastic gives a more bird-like feel and won't rot, crack or peel.**

Our plastic dummies have rectangular raised grippers for a "sure grip" in the dog's mouth. They stay flexible in cold weather and are ideal for water retrieves.
